3. Claims 5-22 are allowed.
4. The following is an examiner's statement of reasons for allowance:

The socket portion includes a strip light cover having a plurality of screw posts with bevel threads formed on an inside surface of such posts. A matching semi-cylinder seat is combined with the cover by a plurality of screws. Two conductors having a folded and elastic holding part are located in the socket portion, with the light elements leads being received by a plurality

of plug holes formed above the holding part of the two conductors, and held by such holding parts.

No prior art was found teaching individually, or suggesting in combination, all of the features of the applicants' invention, specifically the claimed socket portion or conductor structures in combination with the claimed support portion.
